OF THE SUPPLY CHAIN

Table of Contents

The next-generation digital supply chain

Find out how digitising your supply chain will make your business data

More flexible,
More granular,
More accurate,
More efficient,

and massively reduce your business costs!

Digital Supply Chains provide Real-Time Access to Information.

Visibility of supply chain data is critical to success. By digitising your supply chain you can benefit from real-time access to the latest supplier data and internal business data; And create live reports that demonstrate detailed and accurate supply chain insights, **facilitating quicker and smarter business decisions.**

Let us help you transform your business!

Delivering complete **supply chain digitisation**

Foods Connected connects all elements of your supply chain activity, delivering the information you need, when you need it. Our innovative suite of cloud-based supply chain management solutions help to streamline key supply chain processes, improving process efficiency and data visibility to minimise risk and boost profitability.

Foods Connected work with the world's largest retailers, food processing / manufacturing groups and food service providers, as well as many SME food operators, to deliver scalable and tailored digital supply chain solutions.

Implement Foods Connected as a stand-alone platform or integrate it with your existing ERP system to deliver your very own 'Connected Supply Chain' that works for your business.

Supplier Compliance

Supply chains have become increasingly complex, making them increasingly more difficult to manage, resulting in increased risk. Now, more than ever, businesses require robust systems that deliver increased transparency and control to support the ongoing management of their supplier compliance programs.

The Foods Connected Solution

Supplier Approval Lists

Supply Chain Mapping

Supplier SAQ & Risk Assessments

Supplier Approval & Compliancy Tracking

**Supplier Auditing & Scheduling (Mobile App)**

Remote Auditing

Supplier Documentation

Supplier Ranking & KPI's

Supplier Compliance

The Benefits

1. Improve cross-functional collaboration and communication

2. Increase visibility of where supplier risks lie

3. Improve auditing efficiency

4. Gain central visibility of supplier compliance status

5. Leverage quality data to plan ahead

6. Improve efficiency of supplier approval process

7. Achieve end-to-end product traceability

8. Streamline supplier communication

9. Significantly reduce costs of supplier management

Food Safety & Quality

Food Safety and quality management has become an area of increasing concern for food businesses globally, with non-compliance and food recalls posing a catastrophic risk. Therefore, it is critical that businesses have the tools they need to ensure they receive safe and authentic raw materials from suppliers, to deliver consumer products that meet the intended specification.

Digitising your food safety and quality management minimises the risks involved and provides the best protection when proving compliancy with industry regulations.

The Foods Connected Solution

|			
Internal Site Audits	Raw Material Product Checks	Finished Pack Product Quality Checks	Product Risk Assessments
Incident Management	Policies & Procedures	Customer Complaints	HACCP & Document Control

Food Safety & Quality Management

The Benefits

1.
Improve quality of data capture

2.
Real-time insight & analytics on quality issues in your business

3.
Provide suppliers with real-time performance data to drive continuous improvement

4.
Reduce the time and cost needed to complete and manage safety and quality checks

5.
Reduce risk with real-time food safety and quality analytics

6.
Streamline processes to deliver business continuity

7.
Develop a Food Safety & Quality Management Culture internally and with suppliers

Procurement & Supply Chain

The purchasing of products and raw materials can be complex and time consuming, with pricing decisions often based on gut instinct rather than backed by data. Fragmented data capture, processing and storage makes it difficult to report on and analyse historical performance to help make evidence-based decisions.

Our Procurement and Supply Chain solution digitises procurement processes hosting all information on one simple platform to reach the best agreements for both customer and supplier.

The Foods Connected Solution

E-Negotiations & Contracts

E-Forecast & E-Order Manager

Livestock Procurement & Processing Suite

Open Book Supplier Cost Models

Finished Pack Cost Models

Market Sentiment & Forecasts

E-Auctions
Procurement & Supply Chain

The Benefits

1. Improve negotiation efficiency

2. Reduce Raw Material Cost of Goods by 2% - 10%

3. Improve visibility of raw material purchasing

4. Improve Service Level from suppliers & to your customers

5. Improve communication and relationships with your customers

6. Improve accuracy of production planning

7. Improve overall performance and profitability

Specifications & NPD

Our Specifications and NPD solution ensures that collaborating with your team members, suppliers and customers on specifications and new product development is as simple as possible. The solution is designed to mitigate risk of miscommunication, human error or loss of information, by bringing all of vital information into one central hub, using sharable and standardised formats. One Source of the Truth is a key benefit of the Specification Manager ensuring suppliers and customers are all accessing the same data.

The Foods Connected Solution

New Product Development

Retail Pack Specifications
Raw Material Specifications

Packaging Specifications

Complex Ingredients Specifications

Manufacturing Process Specifications

Specifications & NPD

The Benefits

1. Real time collaboration with cross-functional teams and suppliers improves efficiency of specification and new product development.

2. Increased data integrity and acountability is acheived through document version control and full history tracking.

3. Access data on the factory floor, or on the go, even when Wi-Fi connection is not available.

4. Automated update notifications provide increased visability over project progress relevent to you.

5. Visual communication capability through product photos and storyboards provides teams with a deeper level of understanding, improving project efficiency.

6. Applicable solutions for virtually all markets, from ready meals, retail packed meat and seafood to ambient, dairy and canned products.

Food Business I	55.44%	9

Traceability

Product Recalls can be extremely challenging for food businesses to contend with, without the right digital tools in place to efficiently track and trace your product journeys. With a blockchain inspired solution in place you can easily reduce the time and administration associated with trace requests. Plus, reduce risk in your supply chain by having full and instantaneous visibility of your supplier's product movements.

The Foods Connected Solution

Trace Connected

Traceability Manager
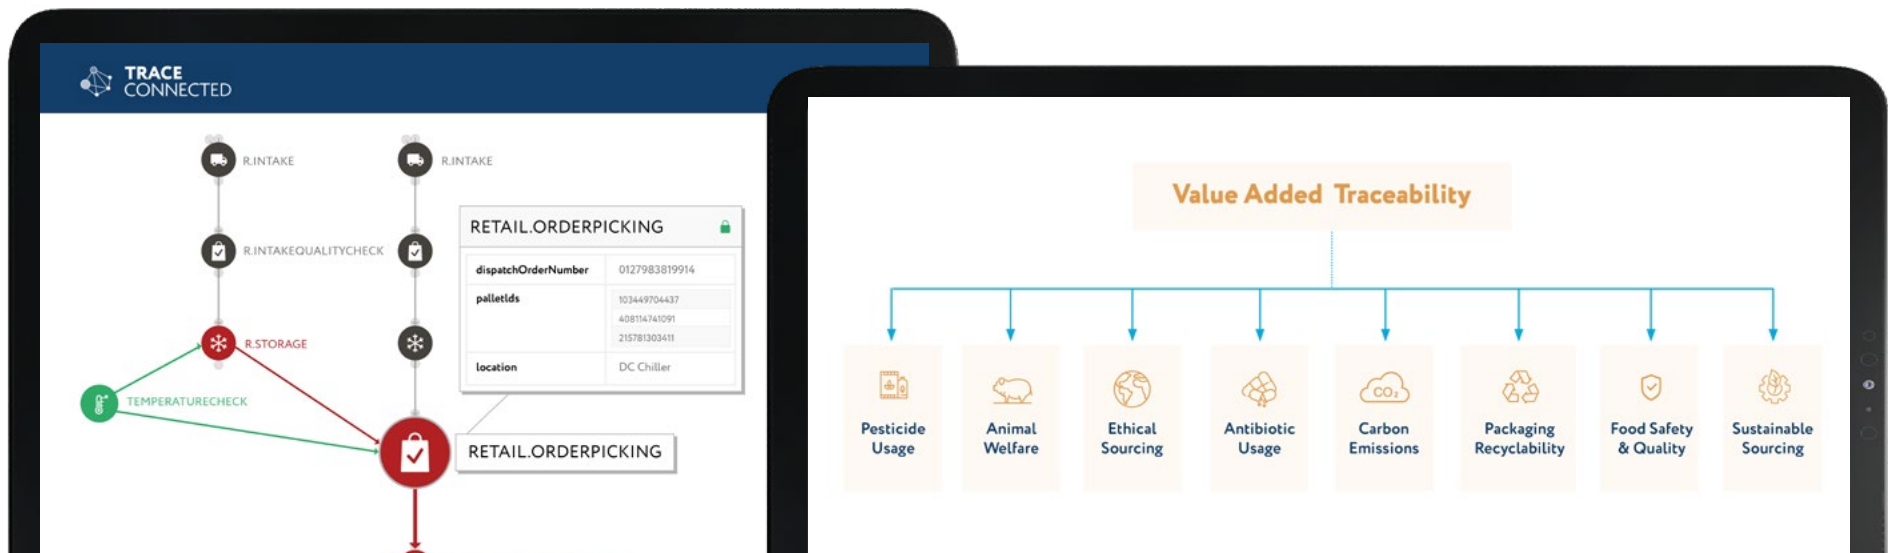

Traceability

The Benefits

1. Real-Time Farm to Fork Traces

2. Recall Tracking & Management

3. Integration with Supplier Systems

4. Total Supply Chain Transparency

5. Fully Tracked History of Edits and Changes

6. Centralised Storage of Trace Events

7. Deliver Consumer Communication

Digital Transformation of the Supply Chain

Why Foods Connected?

1

CLOUD-BASED, ONE STOP SHOP

Manage all aspects our your food supply chain within a **single pane of glass solution.** Benefit from increased visibility with real-time updates, and collect or review data on the go through the Foods Connected App. We offer complete end to end control across your business, at your fingertips.

2

EXPERTISE AT THE CORE

Our software is designed **by food professionals, for food professionals** and developed by experienced IT professionals to bring your desired supply chain management functionality to life. We actively hire the highest calibre of industry expertise, to ensure platform development is driven with knowledge and insight at the core.
3

PAPERLESS, COVID-SAFE SYSTEM

Our configurable solution supports **100% paper free** practices, replacing traditional paper based documents with cloud based documents. Not only is this excellent for your CSR, going paper free is Covid Safe.

End to end software solutions. Configurable for **your** business.

Why Foods Connected?

8
8 of the Largest Retailers in the world.
150+
150+ Manufacturing Factories. All connecting, sharing and receiving information.

8,000+
with 8,000+ Suppliers on the platform.

1,000,000+
1,000,000+ quality checks audits and specifications managed in the system.

$20bn+
$20bn+ of product information being managed in the system every year.

What **our customers** say.

"In my opinion one of our biggest issues is the disconnect we have in our food system. We need to know how our food is produced and where it comes from. I'm delighted to be a research partner with Foods Connected to help address these challenges."

Professor Chris Elliott, Pro Vice Chancellor,
FACULTY OF MEDICINE, HEALTH & LIFE SCIENCES BELFAST.

"We needed a solution to manage our expansive supply chain globally, to create greater transparency over every tier of our diverse network. Foods Connected has provided us with a number of integrated solutions, bringing visibility to our operations, to better track our supplier compliance, mitigating any potential risks."

Simon Rose,
HEAD OF PURCHASING AND INVENTORY, MARLEY SPOON

"Since partnering with Foods Connected we have been able to rapidly streamline our supplier management processes and enhance our data collection. The system is really easy to use and is having a positive impact on ourselves and our suppliers."

Ashleigh Horn,
RESPONSIBLE SOURCING MANAGER, COOK FOOD

"Foods Connected has provided the framework to capture agreed sales & purchasing outcomes in one centralised location. This enables ease of comparison on all best price options for more informed business decisions."

Graham Spicer,
HEAD OF NEW BUSINESS, WOOLWORTHS

"The Foods Connected Specification management tools have allowed us to simplify, standardise and collate all our product data across a multitude of suppliers meaning we have access to the data we need as we need it."

Laura Robinson,
TECHNICAL CONTROLLER, FINNEBROGUE

"Foods Connected has allowed us to easily digitise all of our internal factory auditing across multiple sites allowing us to drive improvement, standardisation and visibility."

Paul Murphy,
ASSISTANT GROUP TECHNICAL MANAGER, ROSDERRA IRISH MEATS GROUP
