

Solutions Technology and Tools

Solutions:

Supplier Compliance

Manage Risk in your **Supply Chain**
with **Visibility, Transparency** and
Real-time Compliance

1. Supplier Approval Lists

5. Supplier Auditing & Scheduling (Mobile App)

2. Supplier Mapping

6. Remote Auditing

3. Supplier SAQ & Risk Assessments

7. Supplier Documentation

4. Supplier Approval & Compliancy Tracking

8. Supplier Ranking & KPI's

Supplier Compliance: Features

1. Supplier Approval Lists

Transparency over who is approved to supply with maintenance of approval status from one central location plus supplier mapping.

FEATURES:

1. Supplier Lists
2. Approval & Certification
3. Documents
4. Supplier Maps
5. Supplier Notes
6. Integration with ERP

5. Supplier Auditing & Scheduling (Mobile App)

Schedule your entire audit activity and hold on-site audits both on and offline.

FEATURES:

1. Mobile App Capability
2. Online and Offline Capability
3. Non-Conformance Management
4. Configurable Audit Templates
5. Reporting & Trend Analysis
6. Photographic Evidence Management

2. Supplier Mapping

Understand every touch point in your supply chain with supply chain trees and use supplier maps to react quickly to incidents.

FEATURES:

1. Visually Intuitive Supply Chain Trees
2. Multiple Tier Transparency
3. Efficient Food Recalls
4. Configurable Templates
5. Tracking of Supplier Changes
6. Supplier Ownership of Mappings

6. Remote Auditing

Remotely audit any supplier without physically being on the premises for complete flexibility in any circumstances.

FEATURES:

1. Any Location
2. Any Certification including BRC
3. Retailer, Environmental, Quality
4. Non Conformance Management
5. Improved Audit Efficiency

3. Supplier SAQ & Risk Assessments

Control over supplier risk levels plus visibility over high, medium and low risks with supplier response tracking and reporting.

FEATURES:

1. Operational Risk SAQ's
2. Responsible Sourcing SAQ
3. Sustainable Procurement SAQ's
4. Review Periods & Reminders
5. RAG'd Scoring Criteria
6. Version Control

7. Supplier Documentation

Gain full visibility over all documentation activity in one digital hub with sharing capability and tracked sign off status.

FEATURES:

1. Operational Risk SAQ's
2. Responsible Sourcing SAQ
3. Sustainable Procurement SAQ's
4. Review Periods & Reminders
5. RAG'd Scoring Criteria
6. Version Control

4. Supplier Approval & Compliancy Tracking

Controlled approval process of requested new suppliers with trended supply chain compliancy over-time.

FEATURES:

1. Stage Gate Approval Process
2. RAG'd Compliance
3. Flexible Compliance Settings
4. Compliancy Trend Analysis
5. Specified Approvers
6. Approval Reminders

8. Supplier Ranking & KPI's

Customisable supplier ranking and KPI reports, plus visibility over which suppliers are performing well and which are under-performing against your targets.

FEATURES:

1. Customisable Live KPI Dashboards
2. Supplier League Tables
3. Improve Supplier Performance
4. Real-Time Information
5. Technical, Quality, Sustainability & Commercial

Food Safety & Quality

Reduce Risk and Improve
your **Quality Culture**

1. Internal Site Audits

5. Incident Management

2. Raw Material Product Checks

6. Policies & Procedures

3. Finished Pack Product Quality Checks

7. Customer Complaints

4. Product Risk Assessments

8. HACCP & Document Control

Food Safety & Quality: Features

1. Internal Site Audits

Configured templates to complete all internal audits with management over non-conformances and what tasks need completed when and by which team member.

FEATURES:

1. High/Low GMP Audit
2. Pest Control Checks
3. Pre-Production Hygiene Audits
4. Customer Standard Audits
5. Environmental Audits

2. Raw Material Product Checks

Perform checks & capture key quality criteria on raw materials that you are dispatching from your factory or receiving into your factory.

FEATURES:

1. Supplier Dispatch Quality Checks
2. Customer Intake Quality Checks
3. Specification Compliance Checks
4. Temperature Checks
5. Microbiological Tests

3. Finished Pack Product Quality Checks

Complete checks on finished products during production, at dispatch and even in-store. Compare quality and identify areas for improvement.

FEATURES:

1. Production Line Checks
2. Organoleptic Testing
3. Retail Depot & Store Checks
4. Competitor Product Benchmarking

4. Product Risk Assessments

Complete and automate risk assessments based on product data to minimise risk at the earliest stage of development.

FEATURES:

1. Complex Ingredients Risk Management
2. Raw Material Risk Assessments
3. Finished Product Risk Assessments
4. TACCP & VACCP

5. Incident Management

Log, track, and report on external incidents that may impact your business, ensuring that the risk your posed by your products are fully understood.

FEATURES:

1. Filter & Search Ability
2. Incident Management with Suppliers
3. Investigation Process
4. Feed Data to Risk Assessments

6. Policies & Procedures

Manage all types of policy and procedures and build your own categorisation to manage and find the documents you require quickly.

FEATURES:

1. Foreign Body Procedures
2. Environmental Policy
3. Industry/Customer Standards
4. Pest Management Policy
5. Employee Training Matrix

7. Customer Complaints

Capture all customer complaints in a standardised format to enable analysis and facilitate your business to drive improvement.

FEATURES:

1. Complaint Cost Management
2. Centralisation of All Complaints
3. Internal Non Conformance Management
4. Scoring Criteria on Complaints

8. HACCP & Document Control

Utilise workflow functionality to ensure HACCP plans are created and managed in a professional structured process.

FEATURES:

1. Detailed HACCP Plan Creation
2. Stage Gated Workflow Management
3. Linkable to Other Tools
4. Configurable to Your Business

Procurement & Supply Chain

Optimise your **Procurement Processes** & Reduce end-to-end costs by **2-10%**

1. E-Negotiations & Contracts

5. Finished Pack Cost Models

2. E-Forecast & E-Order Manager

6. Market Sentiment & Forecasts

3. Livestock Procurement & Processing Suite

7. E-Auctions

4. Open Book Supplier Cost Models

Procurement & Supply Chain: Features

1. E-Negotiations & Contracts

Configurable procurement events to suit your business needs and buying processes.

FEATURES:

1. Configurable Negotiation Templates
2. Real-Time Analytics & Best Buy Scenarios
3. Contracted Volume Completion
4. Integration with Internal Systems
5. C.O.G. Change Analysis vs Market Pricing

5. Finished Pack Cost Models

Gain transparency on the cost make up of the final pack price of finished goods you purchase.

FEATURES:

1. Collaboration with Suppliers
2. Product Yield Management
3. Link to Sales Forecasts & Pricing
4. Calculate & Track Category Margin

2. E-Forecast & E-Order Manager

Real-time transparency on what product is needed, where and when.

FEATURES:

1. Connected Product Movement
2. Electronic Confirmation on Availability
3. Management of Forecast Changes
4. Automated Notification on Shortages
5. Service Level Analytics

6. Market Sentiment & Forecasts

Better understand market trends for products you are buying or selling.

FEATURES:

1. Commodity Price Sentiment
2. Increase Market Knowledge
3. Track Forecasts vs. Actual
4. Supplier & Colleague Collaboration

3. Livestock Procurement & Processing Suite

Livestock purchasing tools that connect your business with farmers in a way never possible before.

FEATURES:

1. Configurable Pricing Grids
2. Livestock Contracts & Orders
3. Kill Data & Payment Calculation
4. Farmer Performance Dashboards
5. Yield & Production Planning
6. Production Reconciliation & P+L

7. E-Auctions

Ensure the best price possible is achieved on specified commodities.

FEATURES:

1. Negotiations
2. Promotions
3. Contracts
4. Costings

4. Open Book Supplier Cost Models

Build detailed supplier agreements for raw materials.

FEATURES:

1. Protein Carcase Modelling
2. Fresh Produce Agriculture Models
3. Cost Management & Improvement
4. Transparent & Sustainable
5. Performance Analytics

Specifications & NPD

Create, Collaborate, Manage
and Share with Real Time Data

1. New Product Development

4. Packaging Specifications

2. Retail Pack Specifications

5. Complex Ingredients Specifications

3. Raw Material Specifications

6. Manufacturing Process Specifications

Specifications & NPD: Features

1. New Product Development

Your NPD critical path in one place for easy collaboration across different functional departments.

FEATURES:

1. Stage Gate Process Control
2. Collaborate Internally & With Customers
3. Fully Configurable Process & Format
4. Deadline Tracking & Gantt Charts
5. Recipe Development
6. QUID & Nutritional Data Management

4. Packaging Specifications

Configure your packaging specification template to include all the information that you need from suppliers.

FEATURES:

1. Customisable Templates
2. Collaboration with Suppliers
3. Food Safety Requirements
4. Country Legislation
5. Chemical Legislation
6. Recyclable Data

2. Retail Pack Specifications

Manage specification data for all food types that your business produces, buys or sells.

FEATURES:

1. Ready Meals
2. Retail Packed Meat, Poultry & Seafood
3. Fresh Produce
4. Ambient Products
5. Dairy Products
6. Canned Products

5. Complex Ingredients Specifications

Easily shared ingredients specifications with full recipe breakdown including mixing bowl and percentage breakdown of each component part.

FEATURES:

1. Allergen Management
2. Nutritional Information
3. Additives & Dietary Derivatives
4. Standardised Format for All Suppliers
5. Advanced Search Ability

3. Raw Material Specifications

Manage all your raw material specifications in one location, in a standardised format.

FEATURES:

1. Product Photos & Storyboards
2. Quality & Packaging Requirements
3. Sharing with Suppliers/Customers
4. Sign-Off Tracking
5. Mobile Accessible on Factory Floor
6. Link to Product Inspections

6. Manufacturing Process Specifications

Fully customisable templates to manage all your manufacturing process specifications.

FEATURES:

1. Visual Story Boards
2. Operative Step-by-Step Guides
3. Mobile Accessible on Factory Floor
4. Change Tracking & Version Control
5. Link to Production Quality Checks

CSR

Data Driven Insights and Tools to keep your CSR Initiatives on Track

1. Animal Welfare

5. Factory Energy Auditing & Reporting

2. Responsible & Sustainable Sourcing

6. Environmental Audits

3. Packaging Consumption Monitoring

7. Supplier Sustainability Ranking

4. Food Waste Management

CSR: Features

1. Animal Welfare

Capture key animal welfare outcome measure data within your own business and your suppliers businesses, both on and offline.

FEATURES:

1. Animal Welfare Audits
2. BBFAW Advice & Support
3. Remote Audit Capability
4. Antibiotic Usage Tracking & Analytics

2. Responsible & Sustainable Sourcing

All sourcing information centralised in one location to ensure your supply chain and internal team are all aligned on policies, procedures and sourcing status.

FEATURES:

1. Policy & Procedure Management
2. Modern Slavery Policy
3. Sustainable Sourcing Analysis
4. Risk Management

3. Packaging Consumption Monitoring

Capture all packaging data and link it automatically to sales data creating insightful packaging consumption metrics.

FEATURES:

1. Packaging Specification Data Capture
2. Configurable Templates
3. Metrics on Recyclability & Other Metrics
4. Consumption Trend Analysis

4. Food Waste Management

Build fully configurable templates to capture and record all of your food waste data in one central hub.

FEATURES:

1. Food Waste Targets & Tracking
2. Configurable Data Capture Template
3. Internal & Supply Chain Data
4. Centralised Waste Data Management

5. Factory Energy Auditing & Reporting

Complete visibility and control over all your energy policies, organisational roles and responsibilities in one place.

FEATURES:

1. Energy Policy Management
2. Energy Audits
3. Energy Objectives & KPI's
4. System Integration

6. Environmental Audits

Share environmental policies with your suppliers, build environmental SAQ's and use our convenient mobile app to carry out environmental audits.

FEATURES:

1. Internal Environmental Audits
2. Environmental Policies
3. Supplier Environmental SAQ's
4. Supplier Environmental Audits

7. Supplier Sustainability Ranking

Gather data easily on your supply base and rank them according to sustainability best practice.

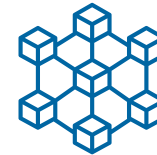

FEATURES:

1. Weighted scoring for each set of criteria
2. Configurable to your own CSR objectives
3. Dashboards and Ranking
4. Pull data from other tools

Traceability

Fully Traceable Authentic Products with
Peace of Mind That **Your Brand is Protected**

1. Trace Connected

2. Traceability Manager

3. How does it work?

Traceability: Features

1. Trace Connected

Blockchain Style Traceability. Robust and flexible technology to capture trace and other quality related information.

FEATURES:

1. Cryptographic Ledger Technology
2. Real-Time Farm to Fork Traces
3. Recall Tracking & Management

2. Traceability Manager

Easy tracing of product types from your suppliers, traceability checks and results reporting.

FEATURES:

1. Full History of Edits and Changes
2. Customisable Templates
3. Easy File Upload
4. Centralised Storage of Trace Events
5. Snapshot Reports

3. How does it work?

STEP-BY-STEP

1. Define your trace events and the data that needs to be captured at each stage of the product journey through the supply chain.
2. We help you model the trace using our trace configuration language Trace ML. Trace ML is unique to Foods Connected and allows us to set up the event specific to your business requirements.
3. The unchangeable cryptographic ledger technology developed by Foods Connected is a repository of linked data blocks accessed through our Trace API.
4. Each data block contains a unit of trace data along with a unique signature used to verify its origin and its place in the overall trace.
5. New trace data blocks are linked automatically to prior data blocks based on fields defined in Trace ML (our trace configuration language), then signed by your private identification keys, forming a tamper proof chain of events.
6. To guarantee that the overall system is consistent and tamper proof we will push a regular anonymised digest of the system to a public blockchain.
7. This will act as a safeguard for your company trace information and allow you to verify that your data has not been tampered with.

Reporting & Analytics

Make **Evidence-Based Decisions** with **Configurable, Insightful Dashboards**.

1. Foods Connected Reporting Methodology

5. Product Quality Analytics

2. Procurement Analysis and Insight

6. Supplier Compliance Reports

3. Factory Production Performance

7. External Market Data

4. Internal Planning and Supply Chain Analytics

8. CSR Reporting

Reporting & Analytics: Features

1. Foods Connected Reporting Methodology

Ensure that the right analytics are delivered to the right person at the right time.

FEATURES:

1. Multi Stakeholder Structure
2. Right Analytics, Right Person, Right Time
3. Connected Structure of Dashboards
4. One Source of Truth
5. Visualisations, Trends & Targets

2. Procurement Analysis and Insight

Real-time transparency on what product is needed, where and when.

FEATURES:

1. Cost of Good Movements
2. Livestock Prices
3. Inter-company Commodity
4. Price Comparison
5. Supplier Cost Analysis
6. Configurable Dashboards

3. Factory Production Performance

Create customisable factory reports to help you run your business more efficiently, including production profit and loss reports by site and department.

FEATURES:

1. Predicted vs Actual Yield Analysis
2. Yield Performance by Product
3. Production Value Analysis
4. Internal or Supplier Usage
5. 5th Quarter and Offal Yields & Revenue

4. Factory Production Performance

Access to 'live' stock management reports, production plans, order management and more, showing stock by individual product and all movements of that product.

FEATURES:

1. Stock Control
2. Production Plan Management
3. Service Level Reports
4. Delivery on Time Reports

5. Product Quality Analytics

Complete compliance and product quality data to track and trend how you and your suppliers are performing against agreed targets.

FEATURES:

1. Complaints Trends
2. Retail Pack Assessment Reports and Trends
3. Retail Store Product Checks
4. Intercompany Quality Performance

6. Supplier Compliance Reports

Full visibility over your top performing suppliers with report data from compliance, quality and even commercial activity- all creating supplier ranking score cards.

FEATURES:

1. Supplier Ranking
2. 360 Degree Visibility
3. Audit and Document Responses
4. Intake Quality Performance
5. Supplier Audit Status

7. External Market Data

Complete access to a vast range of open source global industry statistics in one central location.

FEATURES:

1. Global Livestock Prices
2. Livestock Slaughter & Herd Figures
3. Dairy Market Data
4. Other Food Commodity Data
5. Imports & Exports

8. CSR Reporting

Capture all your CSR data in one central platform and report consistently across your organisation.

FEATURES:

1. Animal Welfare Reporting
2. Carbon Emissions Reporting
3. Food Waste Reporting
4. Antibiotic Usage Reporting
5. Packaging Reporting
